- If
  - Want something to happen IF a **special** CASE is true
  - nothing happens to all other CASES
- If – else
  - Want something to happen IF a **special** CASE is true
  - ELSE the other thing happens to all other CASES
- If – else if – else
  - Want something to happen IF a **special** CASE is true
  - ELSE want something to happen IF the second **special** CASE is true
  - ELSE the other thing happens to all other CASES
  - (you can have as many special cases as you want just add more **else if**s
 - Example of 4 special cases and an else for remaining cases:

  if …
  else if ….
  else if…
  else if…
  else …

```
statement0
if (?) {
        statement1
}
statement2
```

```
statement0
if (?) {
        statement1
} else {
        statement2
}
statement3
```

```
statement0
if (?) {
        statement1
} else if (?2) {
        statement2
} else {
        statement3
}
statement4
```

```
statement0
if (?) {
        statement1
        if (?2) {
                statement2
        }
        statement3
}
statement4
```

```
statement0
if (?) {
        statement1
        if (?2) {
                statement2
        }
        statement3
}
statement4
```

This is just an if…

What would it look like if this if was an if-else?
