1	well done
2	nothing
3	it may be a good idea to introduce some basic about computer, for example, introducing briefly how computer works.
4	great
5	Would be better if computer science is taught in class more than just doing worksheets. If you actually taught something in class, I might have understood something. I had a bad time in this course and this course negatively affected my next year's specialization selection.
6	Very kind and patient.
7	Thanks for always being patient to my questions.
8	Thank you!!
9	She is nice and an effective teacher.
10	She is good at explaining people how to do something and giving tips, she can improve if maybe theres a possible way to give more analogies on whats going on in the program.
11	She did well in the explanation.
12	She did the solution, step by step, for the problem after leaving the student to try by them self, explaining each step.
13	She can explain well and clearly!
14	Professor Celina is really a nice person, she always patient, and has well control of class.
15	I think the instructor did a great job.
16	I really liked the build-up with worksheets in class and that the office hours where directly after class so that one could stay to work if one needed some extra help with something or just wanted to sit there and work with the course and have the ability to ask questions.
17	I have learned a lot about computer science and coding.
18	Explain the concept of C language more clearly
19	Did a lot of practices a lot of problems can be figured out by doing the practices
20	Celina did well on teaching programming C, and I learned a lot, thanks.
21	Always stay after class to answer questions
